

PEST & TERMITE CONTROL
AIR DUCT CLEANING
CRAWLSPACE RESTORATION

To Matrix Networks:

Thank you to everyone on the Matrix Networks Team for great customer service and professional attitude. I have been working with Matrix Networks for over three years at various companies and I've always been impressed by their attention to detail and willingness to help.

The dispatchers and technical support staff are first class and very flexible when working to accommodate my hectic schedule. Robert Edwards has worked hard with me on systems ranging from Toshiba's to ShoreTel's and always puts in the extra effort to answer my questions and provide solutions in a timely manner. When I've been in need for new solutions or maximizing the use of my current environment Andrew Morrison has been very understanding and knowledgeable. Andrew helped Alpha Ecological through a licensing nightmare, lockdown a solid support agreement, and to fully utilize the features of our existing phone system.

Without the efforts of Robert, Andrew, and all the Matrix Networks support staff it would be impossible for my phone systems to run as smoothly and as effortlessly as they do now.

I have recommended Matrix Networks on many occasions and will continue to do so in the future. Primarily because of their superior customer service and secondly for their incredible knowledge on a huge variety of products and services.

On behalf of everyone at my company, thank you Matrix Networks for the high quality services provided.
