

Now that this is coming to an end I thought I would pass on some info we have heard about Matrix. Mostly everyone we have talked to (companies who also quoted...and a few of our customers) have told us we would not be disappointed in the quality of product you provide or in the after sale service Matrix gives. It seems your company is well respected in your industry. In the quoting process I only heard one bad thing about Matrix...and that was from a guy, who you have obviously under quoted in the past, who would not even give us a quote cause he "could not even come close to what you do"...his words. When we started this move Pastor Glenn and Karen Anderson both told me I should call you...and now with all the info we have gathered it really seems we made the right decision. Thanks to all of you for your help and I just wanted to pass on these findings to you...being in the service industry we always hear the bad stuff...and I always appreciate people passing on the good stuff too. Just thought you would like to know...Greg
